

Quarantine Diary

“1º These days at home with my family I appreciated the moments of union and the conversations we have when we are together at meals.

2. I believe that the world will overcome this difficult moment and soon we will be united with our family and friends.

3. This pandemic made me think that we must never give up happiness..

4. Today, March 27th, I am confident that we will have better days and that the Sun will shine for everyone.
